

API Documentation – Merchant Validation & Payment Service

1. Overview

This API allows third-party vendors to validate customer accounts and process payments for multiple services (utilities, TV subscriptions, mobile money, airtime, etc.) via a **single endpoint**.

2. Base URL

POST `https://172.17.40.39:32629/ElmaThirdPartyVendorsV3/merchants/validate`

3. Authentication

All requests require:

Authorization: Bearer <your_token_here>
Content-Type: application/json

4. Common Request Structure

```
{
  "header": {
    "UniqueID": "<guid>",
    "ServiceID": "<service_id>",
    "ServiceAction": "<GETNAME | PAYBILL>"
  },
  "body": {
    "F011": "<guid>",
    "F101": "1000",
    "F103": "<account_number>"
  }
}
```

Note: Some services require **additional fields** in the body (see per-service examples).
